

Heart shaped box

Materials

- Empty chocolate box.
- Lace flowers.
- Scissors.
- Hot glue gun.

Originally the box shown below was full of wonderful chocolates.

Such an interesting box is far too good to just throw away so decided to find some method of re-using, or re-cycling it.

From a collection of lace bits and pieces, a length of lace with daisy-like flowers was found, with just enough flowers to go around the side of the box lid and around the top surface.

Each flower was cut off individually and with a dab of hot glue, fastened evenly around the box as shown below.

It is now re-used as a button box!

1. An unusual shaped box.

2. Now an unusual and useful box!
